

sea of information — everyone wants to be benefited out of it. Our education system is suffering since the initial days of freedom. The situation has not improved yet. Anyhow, many educational policies were made and a big amount of money was fixed for education in number of five-year plans. But it was just circumscribed to papers. Our people are still under-privileged of a proper stable and modernized education system.

On the time of independence, there were limited number of schools, colleges and universities. Initially, the situation was controlled and improved but due to lack of resources, the pace of development remained slow. According to an estimation, in first five-year plan, 580 million rupees were promised to be spent on education system but 400 million rupees were spent actually. Now our education system is facing new challenges and problems. Situation is formidable; the world has entered into an era of computer and information technology while our young generation in backward areas, is still deprived of colleges and schools. Lack of resources is one of the biggest problem of our system. Most of our rural areas are not dispensed with high or private schools. And in the case if schools are found, teachers elude to go to those far off places. Similarly, colleges have been constructed in many villages but due to the absence of teachers, students have to go to distant cities for higher education. Knowledge is just like a deep

As the one knowing the soul joins the trinity of spirit and heart and touch And feels the divine tact Sends up a tentative tent vibrating soul

Moreover, these educational institutions lack basic necessities like laboratories, libraries and even a comfortable furniture. Curriculum or syllabus for out students is old-fashioned and does not execute the requirements of the time. Our private institutions of commerce, business administration and computer sciences, are found on every road and in every street. There is no check on these institutions. Incapable teaching staffs are selling the degrees and producing ineligible graduates — a burden on our economy.

The trend of private institutions should be banned. Fake admissions of these institutions with foreign universities should be checked. They should not be recognized by the government. Ways have been mutating in selection of fields. In the 80's, our young generation was interested in professional education

Knowledge is the essence of life. By attaining knowledge, man entered an era of science and technology. No doubt, all of these are Allah's blessing upon the human beings. Our religion also lays emphasis on attaining knowledge.

The medium of instruction in our system is also an important problem. In most of the government schools, the medium of instruction is Urdu and English is not taught properly as a language. Consequently, on higher level students suffer where medium of instruction is English. Corruption is a factor — attending the basis of our education system. Cheating and corruption in examinations is frequent. Many deserving students cannot show good results despite being having the capability. Many deserving students constructed in many villages but due to the absence of teachers, students have to go to distant cities for higher education. Knowledge is just like a deep
